

# Telecor Public Address & Mass Notification Solutions

## ETHERNET-BASED AND HYBRID SOLUTIONS FOR EMERGENCY AND ROUTINE COMMUNICATIONS

CM3 Building Solutions provides complete public address system installation, integration, and retrofit services. We leverage the industry-leading Telecor product line to enable management of your entire communications platform with no recurring fees or subscription.

With +20 years' experience and +100 Telecor installations, our team understands legacy equipment and excels at systems interoperability.

- » We analyze your current technology to seamlessly and cost-effectively integrate existing equipment with new technology to enhance your day-to-day and emergency communication solutions.
- » We integrate your public address system with emergency help points, lockdown, and fire alarm systems, so you have a comprehensive crisis communications plan.

# INNOVATIVE MASS COMMUNICATION PLATFORM

The e-Series in an Ethernet-based communication system that passes power and data over a facility's existing Ethernet network, ensuring simplified network planning and easy installation.

- » No head-end, central server or control equipment eliminates central point of failure risk.
- » Hybrid capabilities for analog-based facilities enable longer-term transitions.
- » Integration paths with access control, video surveillance, and phone systems.
- » Flexible, endpoint equipment including call switches, speakers, clock/message displays, panic buttons, virtual call stations.

## SCALABLE FLEXIBLE EQUIPMENT

### MASTER CLOCK & MESSAGING HOST

The eMH Master Clock and Message Host provide everything you need to schedule events, synchronize clocks, coordinate emergency drills, manage emergency operations and more.

- » Remote viewing and managing
- » Calendar view for easy scheduling
- » Automated announcements and digital messaging

### CALL STATION

The Telecor call station provides classrooms and common areas with call-in capability for routine messages, as well as strategically-placed panic switches.

- » Call Assurance LED provides call confirmation
- » Privacy, Do not Disturb and Emergency options

### CLOCK SPEAKER MESSAGE DISPLAY

The e2444 display incorporates visual, audio and text components into an easy-to-install single device.

- » Scrolling dot matrix marquee for emergency and routine messages
- » Provides two-way talkback communications
- » Strobe light with variable colors and flash rates

## VIRTUAL CALL STATION

The e-Call application creates a virtual call station on any Windows-based PC. Calls are placed by simply clicking on the virtual call button on the PC screen.

- » Deployable on fixed and mobile PCs.
- » Two-way voice communications via classroom loudspeaker.
- » Supplements or replaces physical call stations.

## DIGITAL & MESSAGE DISPLAY CLOCKS

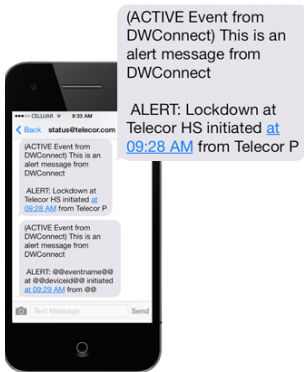

## ADMINISTRATIVE CONSOLE

## INTERIOR & EXTERIOR SPEAKERS

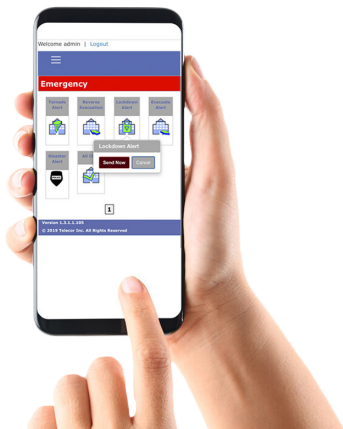

## CUSTOMIZABLE FEATURES & ENHANCEMENTS

## PAGING & MASS NOTIFICATION

District Wide Paging Mass Notification overlay (DW Connect) allows for the centralized, district office to notify one or all schools of an emergency.

- » Each school has local authority to engage.
- » A Graphical User Interface provides for seamless point and click activation
- » Notifications can be sent by text or email to a pre-determined group

## MOBILE ALARM ACTIVATION

Mobile Quick Access delivers alarm activation at your fingertips, including the broadcast of pre-recorded audio announcements over the facility's public address speakers and text messages to eSeries displays.

- » Single-touch lockdown activation
- » Email and SMS messages delivered to customizable recipient list
- » Compatible with Android and Apple devices

# CUSTOMIZABLE FEATURES & ENHANCEMENTS

## DESKTOP MANAGEMENT

eDesktop generates a pre-programmed series of user operations from a single action, reducing time and increasing efficiency. Shortcuts can activate any eSeries function by clicking an icon. These include: alerts, audio distributions, coded and plain text messages, intercom operations, and more.

## DESKTOP MANAGEMENT

Alarm Manager provides real-time room status during a lockdown event in a facility. Occupants report their status directly to the front office or command center. Responders view the status on a room-by-room basis via a detailed facility floor map, using the Visual Console graphical user interface.

## GRAPHICAL INTERFACE

Visual Console™ is an easy-to-use graphical interface that works on any Windows-based PC. It provides a visual overview of the facility at a glance and enables management of the facility's communication platform.

- » Visual overview of the facility including alarm acknowledgement by room
- » Integrated video camera feeds
- » Routine call processing, paging, audio program distribution, bell scheduling, and emergency operations
