

Schneider Electric

SpaceLogic Touchscreen Controller

Customizable Room Controller

The SpaceLogic Touchscreen Controller delivers customized, precise environmental control for every room. Wall-mounted with an intuitive, user-friendly interface, the controller is tailor-made to fit any HVAC application.

SPACELOGIC TOUCHSCREEN ROOM CONTROLLER

Glass cover

Single sheet of glass for easy use and cleaning

RGB LED Back lighting

Customizable for different applications (optional)

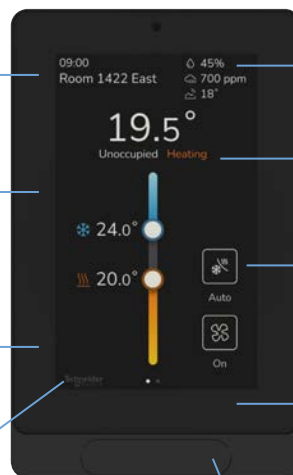

Color choices

Black & white options with custom themes

Customizable UI

Customizable buttons and background with 22 language support

Optional wireless support

Optional Wi-Fi and Zigbee™ support

Open protocol support

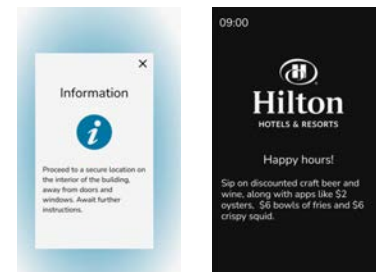

Standard BACnet MS/TP and Modbus RTU

Touchscreen Support

Experience seamless swiping & scrolling through a 4.3" high-resolution display

Custom display option

Create customized displays for advertising and communications.

Built-in sensing

PIR motion detection, light, temperature, and humidity sensors

Customization

- » Immersive occupant experience with custom logos and designs
- » Choice of interface style (slider vs buttons) and display components
- » Promotion of activities and value-add services
- » Two classic casing colors and optional RGB back lighting to match any room décor

Powerful functionality

- » Support for common HVAC applications – rooftop units, fan coils, heat pumps
- » Adjustable sensitivity depending on application and enhanced built-in PIR to match your requirements for enhanced efficiency and operation
- » Configurable Universal I/O points for maximum flexibility in accommodating various types of devices
- » Flexibility to customize any sequence to fit any application

Simple installation and use

- » Simplified, streamlined setup and commissioning
- » Native support with EcoStruxure Building Operation (version 2024 or newer)
- » Native BACnet integration for simple, fast firmware upgrades
- » Easy-to-read enhanced labeling for wire terminals
- » Reduce disruption to occupied spaces thanks to fast commissioning

Value for building owners & facility managers

- » Increase occupant satisfaction by providing personalized experience to control their surroundings
- » Ensure the building meets environmental market standards
- » Reduce energy consumption and improve operational efficiency using advanced room control
- » Integrates easily into existing systems
